Jetzt direkt bewerben

Standort / Region: Berlin
Referenznummer: HQ-1190

RELEASES NEW ENERGY - YOUR COMMITMENT:

- You support Digital Transformation of B2C/B2B Energy services and solution businesses/sales as well as on-going development/integration on demand solution and service platform.
- You assist and conduct Digital Transformation roadmap with business side, also with external vendor(s)/partner(s).
- You define features, phases, and solution requirements.
- You provide specifications according to which the solution is defined, managed and delivered.
- You perform a support role between different internal departments and external stakeholders.
- You help to find the best solution among all possible to integrate our SaaS solution into our client existing IT landscapes.

COMBINES PASSION WITH KNOW-HOW - YOUR PROFILE:

- You are in a university(or higher) degree with a technical or business focus.
- You have strong problem- solving skills and assist in solving customer problems as needed.
- You provide strong paper work (MS Office – Word, Excel, PowerPoint) and interpersonal skills as well as ability to manage and prioritize competing demands.
- You have a business level of communication in English. Knowledge of German is an advantage.
- It would be a plus to have knowledge about energy market and utilities, analytical and technical and/or knowledge of software engineering.

AND THIS IS HOW WE BACK YOU UP:

- Arrival made easy: With the help of a welcome training and an orientation plan, we introduce you to your new tasks in a structured manner. A personal mentor will be at your side with help and advice.
- Moving forward together: In a collegial atmosphere we live open communication, support each other and share our knowledge.
- Good for body and soul: A wide range of health offers from our Q.CARE program, e.g. flu vaccinations or preventive medical checkups, ensure that you stay fit - because the well-being of our employees is close to our heart.
- Mobile on all routes: We offer you flexible working hours and the possibility of mobile working. Well-equipped, barrier-free offices and meeting rooms complete the overall picture.

**We don't just dream of a better future.
We make it a reality together.**

A company with the sun in its heart

As a full-service provider of clean energy solutions, we supply residential and commercial end customers with solar modules and systems as well as power storage. We provide integrated services such as power contracts to provide access to 100% clean electricity. Our global center for technology, innovation and quality is located at our site in Thalheim. From our new office at Südkreuz in Berlin, we manage our sales and distribution as well as the advancement of our services.
